Founder:

Tolaram Ji Sharma (1920 to 1999) was a master of Machinery who founded Tolaram Group in 1950. He had been honored with the title of "Jugad ka Master" in "Itwari Patrika". Tolaram Ji took Tolaram Group from one factory to 5 factories and created a revolution in Heavy Machinery Industries during 1970 by indigenously building a "Continuous Casting and Rolling Mill Machinery, which has capacity to produce 40 Ton Aluminum wire per day and which has also been challenged by "London Head Office of Incab".

Tolaram Ji was a great believer of simple life with great thoughts. His well wishers use of to know him as "Karm Yogi". He always had trust in "Continuous Learning" with a belief of "Work is Worship". As per him, "We have great Engineer in our Country but lack of hard workers a good Engineer is the one who work by his own hands rather than giving instructions to others." He was having a strong faith in "Providing right things at right time with right price"

Due to all his great thoughts and intelligent mind, today the group has well known name in Heavy Machinery Industry with group firms named as - "Indian Iron Man", "Indian Engineering Works", "Mechanical & Electrical Center" & "Rajasthan Heat Treatment". And with a same vision of "providing right thing at right price" group has decided to continue journey further with next generation and with our valued customers with group firms named as "Yug Elevators".

Vision:

Yug continually strives to remain a dynamic organization, extending solutions to key sectors, through its technology driven offerings, leading to enhanced customer satisfaction and delight, achieve horizontal as well as vertical growth, while being a responsible corporate citizen, committed to environmental sustainability at the same time.

Mission:

We aim to achieve our larger objectives by effectively applying our fundamental working principles and values, like professionalism, integrity and an unwavering commitment of providing the best-in-class product offerings, while continuously improving ourselves.

Guiding Values:

Customer happiness: Our customers are of utmost importance to us. We focus all our energies towards providing products that not only match their expectations but surpass them. Extending products and services that ensure customer delight is at the core of all our functioning.

No compromise on values: We believe in delivering value along with our product. In order to ascertain that, we never compromise on aspects like quality, safety, responsibility and transparency. These virtues, in a way characterize everything we do and how we do it.

Adherence to timely delivery: We do not promise if we cannot deliver it. This philosophy and a strict adherence to it has helped us not only retain our customers but has also helped us to create trust and build a positive reputation in the industry.

Attention to operational excellence: A Company's credibility is always as good as its products. The final product is the true proof of a Company's values and beliefs. Bearing this in mind, we always seek newer ways to better our operations and present products that are in accordance with the latest technology and current market requirements.

Our Quality Promise:

Our pledge towards quality has helped us gain a leading edge in this highly competitive domain. We ensure that the highest quality standards are maintained at all stages, right from design conception to the end product.

The sustained reliance placed upon us by our clientele testifies our consistent performance in delivering value through quality management. In order to cater to such a critical service industry, where safety is of highest priority, we follow well-defined guidelines and systems that establish and ascertain implementation of best practices.

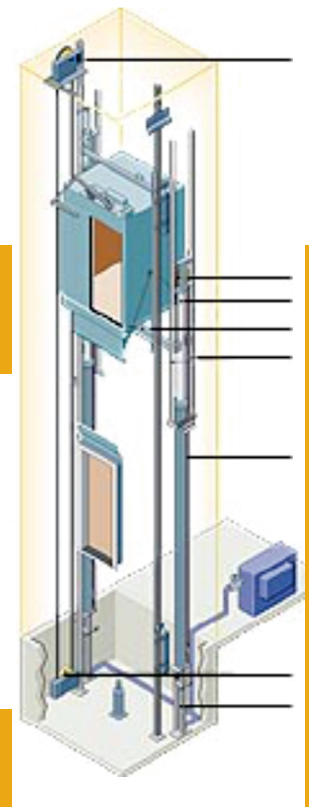

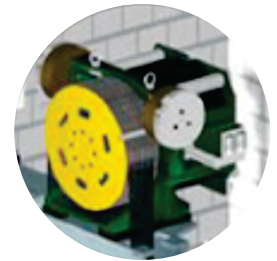

Machine Roomless Elevators

Less Space, Less Energy, More Flexibility

Roomless Passenger Elevator, incorporates environment concern, saves energy consumption, also saves the construction area and gives a free-hand to designers, fully reflects the idea of environment friendly culture.

Compared with the gear wheel elevators with the same load capacity, these elevators save 25% electricity and 10% construction area. Roomless Passenger Elevator have broken through the prerequisite for machine rooms, providing limitless possibilities of creation for the limited space of modern construction.

Gearless Machine

- Roomless Passenger Elevator take less space, which enables you to effectively utilize the construction space.
- They save the construction time, materials and coasts
- The combined design of machine room together with the hoist-way and highly effective installation ensures affect freeness to the engineering caused by the installation of elevators.

Low Noise

Green Environmental Protection

High Efficiency & Energy Saving

Capacity 5 to 13 Passenger

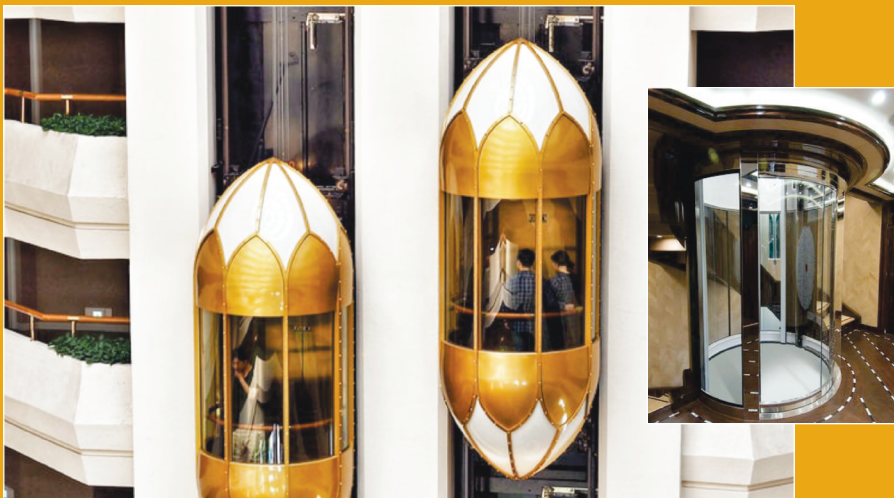

Passenger Elevators

Manual Doors

Features :

- M.S. / S.S. Panels
- Collapsible / imperforated / Three fold sliding / Swing doors
- Power coated (multi-color) cars and doors, elegant in looks, light in weight, and variable speed options.
- Microprocessor based controller with full collective selective control.
- AC VVVF drive for smooth operations and variable speeds.
- Over load indications and floor announcement system.
- Automatic rescue device for power back up.
- Luminous push button/touch button, which are highly attractive and durable.
- Digital / LCD floor indication in LOP & COP.
- Decorative LED lights with suspended ceilings.
- PVC / Marble / Granite Flooring.
- Blower fan for multi-cross air delivery.
- Hand rail with mirror on rear side.

Capacity 10 to 16 Passenger

Capsule Elevators

Construction novel and unique, beautiful appearance, superior quality and refined, the new comfortable Accurate magnificent sightseeing elevator, allowing you to enjoy the modern architecture of extraordinary charm and luxurious, the VVVF inverter-driven energy-saving configuration, carrying a silent corporate social responsibility to calm and comfortable ride experience, a unique fashion look and style of human interface settings, the full interpretation of the elevator for Accurate insights into urban life.

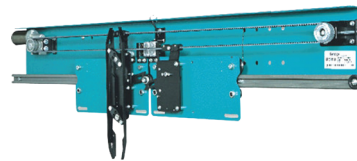

Passenger Elevators

Auto Doors

Elevators are the main transportation arteries in the modern building and are vital in determining a building's economic success.

We manufacture all type of passenger lifts of different capacity and speed. Our latest passenger lifts comprises of V3F Close loop microprocessor controller with sophisticated steel cage & latest electronic components for minimum and easy maintenance as well as low power consumption as per today's need.

We offer different types of cabins using material such as M.S., S.S., and Aluminum etc. We provide latest version of Auto door for cabin and landings etc.

2-PANEL CENTRE OPENING CAR DOOR MECHANISM

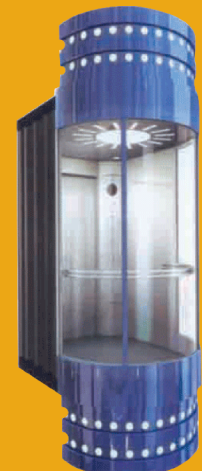

Full Glass Capsule

Three Side Glass With MS Power Coated Car

Three Side Square Glass Capsule

Round Glass Cabin with Stainless Steel Hair Line Finish Car

Capsule Elevator Cabin

Capacity 500 to 3000 KG Load

Goods Elevators

STURDY AND DURABLE :

Cabin is made of highly intensified shaped materials, able to carry various kind of cargos.

ACCURATE LEVELING :

The Accuracy of Leveling can be controlled with in a scope of several millimeter.

LARGE DOOR WIDTH :

Multiple folded cabindoor structure is employed to reach the max width which facilities the entry of large cargos.

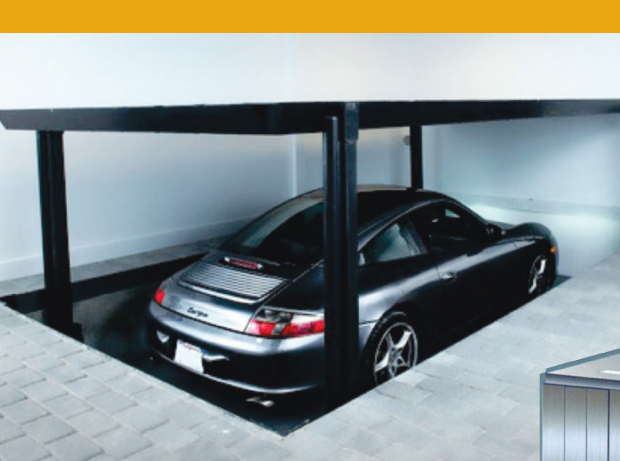

Safe and reliable

Stable and precise

Energy Saving and durable

Capacity 500 to 5000 KG Load

Car Parking Elevators

Features :

- Auto / Manual door opening options.
- These are safe and reliable.
- Two side opening option.
- Heavy duty traction machine.

Our car elevators are installed in buildings where ramps are not possible to construct, due to space constraints. These elevators are operated in similar fashion as freight elevators except for the fact that size and load carrying capacity of lift platform is in accordance with the dimensions & weight of largest vehicle to be transported between floors. Yug Elevator offers all types of vehicle elevator from 1500 kg for smaller cars to 5000 kg for bigger cars like SUVs and tempous.

Over the last few years, Yug Elevator has specialized the concept of vertical Transportation of material through its innovative techniques and designs.

Capacity 8 to 12 Passenger

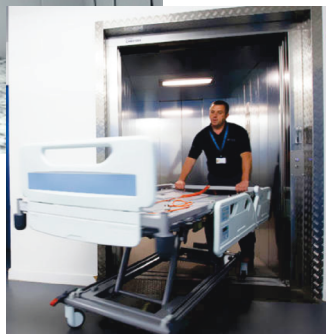

Hospital Elevators

Yug elevator Vertical transportation system for modern hospitals have special requirement such as spacious and durable car, smooth and comfortable travel, accurate stop with inch up and inch down push button control in car, emergency control features and above all, reliability with safety. The car dimensions are as per the Indian Standard requirements for Hospital lifts.

Safety Door Edge (SDE) Standard

A mechanical safety device with a micro switch reverses closing doors if there is physical contact with a passenger or an object.

Stainless Steel Cabin

Two Post Car Parking Systems

Product description - 2 Pole Hydraulic Car Stacker (1+1)

Model	TSR - 001
Stall Length	4.0 Meter
Stall Width	2.2 Meter
Pole Height	3.4 Meter
Max Travelling Height	2.0 Meter
Rated Lifting Capacity	2000 Kg
Rated Speed	Up 0.04 M/S, Down 0.05 M/S
Operation	Hydraulic Power Pack with 2HP Motor, One Cylinder with Control Panel (Per Unit) Operated by Key
Electrical Requirement	3-Phase 415V 50Hz / 1-Phase 220V

Home Elevators

Our home elevators are designed to meet vertical mobility needs in public and private buildings. These elevators serve as ideal solution for elderly people living in multi floors homes or bungalows. it does not require machine room, which gives the architects option to use that space for other requirements of their clients.

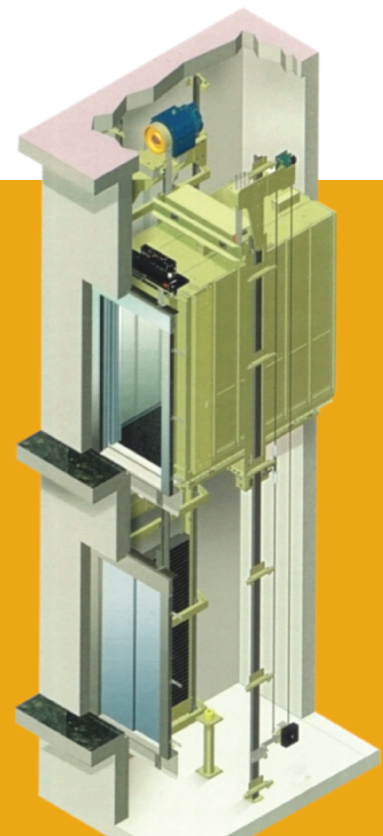

It is a modern product, designed and manufactured to meet a wide range of needs.

Features :

- Wide range of designs to suit your home /bungalow.
- Noiseless and easy to install.
- Requires minimal space.
- Safe and reliable for elderly people . and children at home.

Single Phase Machine

Alternative door styles, different choices
Varies of kinds door open direction provide for you can choose any one of them as per your need and your building requirement.

Side - Opening

Manually Operated Door

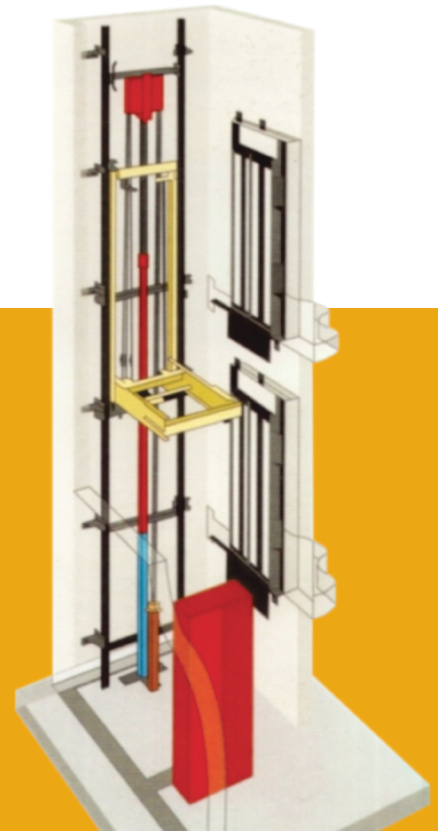

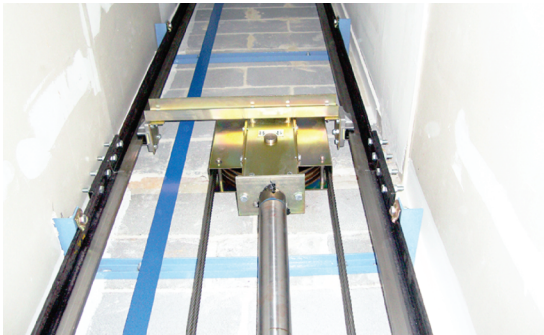

Center - Opening

Hydraulic Elevators (For Low Rise)

Looking for a low-maintenance elevator? Hydraulic lifts provide the advantages of being relatively inexpensive, safe and easy to maintain. They're very convenient and cost-effective solution for low-rise buildings with low traffic.

Hydraulic elevators have been rated the safest option for home elevators. They boast superb use friendliness and easy access machine room located at the basement. Once they are put in place, hydraulic elevators provide the smoothest rides possible.

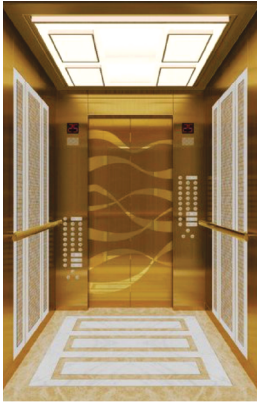

- Optional Machineromless
- Easy Installation
- Short delivery times

Single Cylinder Rope Type

Car Designs

The elevator cabin can make a big impression on passengers. It reflects the building's decor and your commitment to tenants comfort.
